

THE IP ENERGISER

The IP Energizer® is a Wi-Fi enabled electric fence energiser that can be monitored and controlled from anywhere in the world.

Controlling it is easy! Simply download the IP Energiser Controller (IPEC) App, enter your IP Energiser's unique password and start controlling and monitoring your fence.

To achieve this, the IP Energizer® connects to your home Wi-Fi network and from there to the Internet.

How it Works.

1 DOWNLOAD

the IP Energizer® Controller app to your Android device. This app allows you to view your energizer's status and control it from anywhere in the world.

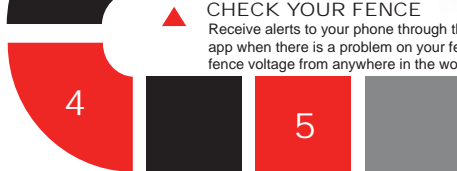

2 CONFIGURE

your IPE nergizer® to connect to your Wi-Fi network.

3 CHECK YOUR FENCE

Receive alerts to your phone through the IP Energizer® app when there is a problem on your fence and check fence voltage from anywhere in the world.

4 RESPOND

to alerts when there is a problem with your fence. Turn your fence off remotely, allowing for safe repairs and maintenance.

5 RELAX

knowing that you can check your fence whenever and from wherever you want - without even leaving your armchair.
